

Surveyor General of PA on April 26, 1698. Edward married Sarah Jennings in Burlington, NJ on Nov. 11, 1701. Edward died shortly thereafter, his posthumous child Isaac gave rise to Group XVIII. The last known male Pennington of Group XVIII was John, born in Philadelphia on May 6, 1758. There were four Pennington's of this group in the 1790 census. Of these, Edward was the colonial equivalent of a millionaire. Edward, a Quaker, was a pacifist and persecuted during the revolution. The lead roof of his mansion in Philadelphia was confiscated for the revolution. This group owned property in Burlington NJ and Philadelphia and apparently never spread farther.

GROUP X

Group X - the descendants of Thomas of Surry and Sussex Counties VA and his Probable immigrant father Edward of York Co., VA 1649 were well documented in PP XI-1 pp 53 to 63 complete with map, none the less they are included in the decennial survey for completeness.

HOW TO FIND TO WHICH GROUP YOU BELONG

Many new Pennington cousins come to us in hopes of finding their ancestry all the way back to a colonial immigrant. We have had remarkable luck in connecting new cousins with their groups. But those who have not been so lucky can do a great deal for themselves at very little cost. The first thing to do is list what you really do know as opposed to the wild traditional stories of "3 bound boys and so on. If you can get back to the 1840's or 1850's, you are in fairly good shape, all you need do is find where your Pennington ancestors were living in 1850 or 1860, borrow the county census (microfilm) for that year from the national archives through your local library and read it. It will give you the year of your ancestors birth as well. Then using the migration story in X-2 pp 1-16, you should be able to find out what groups are where at that time. The census issue (PP XI-1 pp 1-33) can also be used, especially since every name in the census is indexed. If your male Pennington ancestor was old enough to have a household he is most likely listed there. We have covered most of the counties that Penningtons are in. Or, look up your Pennington ancestors in the 1880 or 1900 census and find what state their fathers and mothers were born in. Since Penningtons are like grapes (they come in bunches) if you can locate the group another very close nearby Pennington belongs to, you should have a better idea of where to look. The map in this article shows where every known Pennington other than group X lived during colonial time until Cluster A moved south.

DECENNIAL SURVEY OF COLONIAL PENNINGTONS
